Summary

Full-stack software engineer with 2 years in production across Angular, TypeScript, and Go. My work centers on the structural layer: CI pipelines, legacy refactors, and internal tooling. I also maintain an open-source AI agent framework with 57 npm releases.

Experience

Badan Sistem Informasi, Universitas Islam Indonesia , Software Engineer	Yogyakarta, Indonesia
- Rebuilt the GitLab CI deployment pipeline for a 20+ module Angular platform backed by 13 REST endpoints, cutting release time from 20–30 minutes to 1–3 minutes; adopted as the standard across 7 engineering teams - Cut MySQL queries that regularly timed out from up to a minute to under 10 seconds, using composite indexes and N+1 query elimination on Go/Gin and PHP/Lumen backends - Converted a 66,000-line Angular library to full Indonesian and English support: 53 templates, 1,718 bindings, and 619 dictionary keys. Authored the migration schema and a file-by-file pre-work audit - De-duplicated 7 near-identical submission-form modules and eliminated RxJS subscription leaks and race conditions across partnership components - Designed multi-level RBAC routing with 21 per-role workflow components - Authored the team’s engineering standards, development workflow guide, and release-versioning model: 120 KB of documentation that now governs multi-environment releases	Oct 2024 – Present 2 years
Softwaredeecode , Front-End Developer (Freelance)	Remote
- Developed the admin and student frontends of TembusIn, a 4-track exam-prep LMS (SNBT, TKA, CPNS, PPPK), in React, Vite, TypeScript, and Tailwind CSS. Live at fe-tembusin.deecodesoftware.com - Translated Figma specs into responsive interfaces and integrated REST APIs with typed clients and skeleton loading states - Optimized animation performance and deployed the production build to a VPS	Nov 2025 – Apr 2026 6 months
TerraCode , Web Developer	Remote
- Delivered 5 client websites in WordPress and Elementor across Indonesian, Vietnamese, and European markets - Built a WPML multilingual cruise-booking site and ran on-page SEO campaigns for lead-generation sites: salsationcruise.com, deresto.eu, theextramile.co, cg-carworks.com, and pelanbali.com	Oct 2023 – Jan 2024 4 months

Projects

Noir	July 2026 – Present
Open-source orchestration and memory layer for AI coding agents · github.com/agaaaptr/noir	
- Published an 11-package TypeScript monorepo to npm with native installers for macOS, Linux, and Windows - Built a hybrid retrieval engine combining BM25 and vector kNN with Reciprocal Rank Fusion, exposed through an MCP daemon serving 24 tools to 5 AI coding hosts - Added 216 test files and set up a release pipeline using npm OIDC trusted publishing with SLSA provenance attestation	

Portfolio & Project Showcase

Jan 2026

Next.js, React, TypeScript, Tailwind CSS · aga-putra.vercel.app

- Built a Next.js 16 portfolio with dynamically imported sections using `ssr: false` to eliminate framer-motion hydration mismatches
- Rendered all sections client-side behind scroll-tracked single-page navigation with section-state persistence

Skills

Programming Languages: TypeScript, JavaScript (ES6+), Go (Golang), PHP, SQL, HTML5, CSS3

Frameworks & Libraries: Angular, React, Next.js, Gin, Lumen, Tailwind CSS, Vite, REST API

Databases & Tools: MySQL, PostgreSQL, Git, Figma, WordPress

Spoken Languages: Indonesian (Native), English (Professional Working Proficiency)

Education

Bachelor Universitas Teknologi Yogyakarta, Informatics

Yogyakarta, Indonesia

- GPA: 3.58/4.00

2020 – 2024
